Littmann® Stethoscopes

3M

To-day 3M™ Littmann® stethoscopes are used worldwide. A wide variety, in both traditional double-sided and single-sided tunable diaphragm chestpiece designs, are available to meet virtually every auscultation need.

Littmann® stethoscopes' features for doctors and patient include non-chill rims, patented 3M™ Littmann® Snap Tight Soft-Sealing Ear-tips, anatomically correct ear-tubes, excellent warranty and service programs, and a choice of contemporary tubing colours.

The standards for stethoscope performance, sound transmission, efficiency and comfort for both wearer and patient have come a long way from Rene Laennec's rolled paper. Listening to body sounds and interpreting their meaning is truly a art in the hands of a trained health care professional using to-day's advanced Littmann® acoustical and electronic stethoscopes

3M™ Littmann® Electronic Stethoscope Model 3100

- 85% Ambient Noise Reduction
